Date:

Name & Address of Patient :

Dear

We have received a referral letter from Dr..... requesting an appointment for us to see you in the Genetic Clinic atHospital. Before we are able to send you an appointment for this clinic, we need you to complete the enclosed questionnaire and return it to us. We advise that you keep a photocopy, in case the questionnaire gets lost in the post. This family cancer history information is necessary and important for your clinic management. Please note that you will not be offered a clinic appointment until you have returned the questionnaire.

Yours sincerely,

Secretary to
